EXAMINER

GAUTHIER, GERALD

ART UNIT PAPER NUMBER

2645

DATE MAILED: 08/25/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

10/050,091

**Applicant(s)**

KAR-KIN AU ET AL.

**Examiner**

Gerald Gauthier

**Art Unit**

2645

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 22 March 2005.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-33 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1-33 is/are rejected.  
7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.  
10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.  
5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claim(s) 1-33** are rejected under 35 U.S.C. 102(e) as being anticipated by Patel et al. (US 6,865,185 B1).

Regarding **claim(s) 1, 12 and 23**, Patel discloses an access point for scheduling delivery of units of data to a plurality of access terminals (FIG. 1 and column 1, lines 21-24) comprising:

a) a network interface (32 on FIG. 2) for receiving data from a communication network (FIG. 2 and column 8, lines 34-44) [The dynamic flow manager 32 receives an incoming packet stream from the network];

b) a wireless interface (20 on FIG. 1) for transmitting units of the data to a plurality of access terminals (FIG. 2 and column 7, lines 26-35); and

c) a control system (34 on FIG. 2) having a plurality of queues corresponding to the plurality of access terminals (FIG. 2 and column 9, lines 26-40) and adapted to:

- i) store the data received over the communication network as units in the plurality of queues for the plurality of access terminals (FIG. 2 and column 9, lines 26-40) [The dynamic bandwidth estimator 34 stores the packets in a queue to allow the virtual groups 36 to control its own congestion];
- ii) determine a temporal fading factor based on a current channel condition relative to an average channel condition for each of the plurality of access terminals (FIG. 2 and column 9, lines 26-40) [The dynamic bandwidth estimator 34 assesses the affected virtual group 36 based on notification of dynamic regrouping of flows to enable the interface impact and the congestion parameters for the group];
- iii) determine a throughput fairness factor based on throughput capability for each of the plurality of access terminals (FIG. 2 and column 10, lines 26-42) [The packets data 60 are serviced in an order in which they arrive in order to maintain fairness among the group 36 based where sufficient bandwidth is available];
- iv) determine a delay Quality of Service factor based on delivery times associated with at least one unit for each of the plurality of access terminals (FIG. 11 and column 16, lines 1-8);
- v) calculate a weighting factor based on the temporal fading factor, the throughput fairness factor, and the delay QoS factor for each of the plurality of access terminals (FIG. 11 and column 16, lines 39-61); and
- vi) select a unit for transmission via the wireless interface from one of the plurality of queues based on the weighting factor (FIG. 12 and column 17, lines 1-13).

Regarding **claim(s) 2, 13 and 24**, Patel discloses the control system is further adapted to:

- a) determine the average channel condition over a period (column 16, lines 44-61);
- b) determine the current channel condition (column 16, lines 44-61); and
- c) calculate a ratio of the current channel condition to the average channel condition to determine the temporal fading factor (column 16, lines 44-61).

Regarding **claim(s) 3, 14 and 25**, Patel discloses the current and average channel conditions are derived from carrier-to-interference ratios (FIG. 1 and column 6, lines 12-22).

Regarding **claim(s) 4, 15 and 26**, Patel discloses the throughput fairness factor is calculated in a manner deemed to achieve a select level of fairness between access terminals having better channel conditions and access terminals having worse channel conditions (FIG. 12 and column 10, lines 26-42).

Regarding **claim(s) 5, 16 and 27**, Patel discloses the throughput fairness factor is a function of the average channel condition (FIG. 12 and column 10, lines 26-42).

Regarding **claim(s) 6, 17 and 28**, Patel discloses the throughput fairness factor is a function of an average throughput rate (FIG. 12 and column 10, lines 54-66).

Regarding **claim(s) 7, 18 and 29**, Patel discloses the throughput fairness factor is a further function of the average channel condition (FIG. 12 and column 10, lines 54-66).

Regarding **claim(s) 8, 19 and 30**, Patel discloses the delay QoS factor for each access terminal is a function of the deliver times for a plurality of the units in each queue including the next unit to transmit in each queue (FIG. 11 and column 16, lines 44-61).

Regarding **claim(s) 9, 20 and 31**, Patel discloses the delay QoS factor for each access terminal is a function of an amount of data to be transmitted (FIG. 11 and column 16, lines 44-64).

Regarding **claim(s) 10, 21 and 32**, Patel discloses the control system is further adapted to:

- a) calculate a weight inversely proportional to the delivery time for a plurality of the units in each of the plurality of queues (FIG. 11 and column 16, lines 44-64); and
- b) calculate the delay QoS factors for each access terminal by summing the weights for the plurality of units in each of the plurality of queues (FIG. 11 and column 16, lines 44-64).

Regarding **claim(s) 11, 22 and 33**, Patel discloses the control system is further configured to assign a defined weight for units having a delivery time greater than a defined threshold (FIG. 12 and column 17, lines 1-13).

### ***Response to Arguments***

3. Applicant's arguments with respect to **claim(s) 1-33** have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald Gauthier whose telephone number is (571) 272-7539. The examiner can normally be reached on 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on (571) 272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
